ACADEMIC PROJECTS

Ecommerce   Live

- It is a comprehensive e-commerce platform enabling user registration, login, and product purchases.
- Implemented product filtering by price and category and search functionality by product name.
- Designed and integrated dual user roles

  - Admin: Access to an admin dashboard to view all orders, total revenue, and user statistics. Capabilities include changing user roles, listing new products, and updating order statuses.
  - User: Ability to browse, filter, and purchase products seamlessly.

- Utilized MERN stack (MongoDB, Express.js, React, Node.js) for robust and scalable application development.

WanderLust   Live

- It is a responsive Airbnb-like platform where users can sign up, log in, create home listings, view other listings, and leave reviews.
- Ensured compatibility across all devices for a seamless user experience.
- Technologies used
  - HTML, CSS, JavaScript, Bootstrap
  - Node.js, Express.js, MongoDB
  - RESTful APIs, EJS Templating, MVC Model

Javascript projects

- Simon's game
